

## The Largest Wide-Area Digital Radio Network in South Florida

**The Future of Two-Way Radio.** Motorola's MOTOTRBO digital technology breaks through to a new level of performance.

MOTOTRBO Connect Plus multi-site digital trunking is a 900 MHz two-way radio system that combines the best in trunked radio with digital technology to provide seamless roaming, clearer voice, and data communications over a wider area. This means more productivity and lower costs for your business.

### ADVANTAGES OF DIGITAL NETWORKING

- **Seamless roaming throughout the network** - no more switching channels
- **Exceptional voice quality** without background noise and static
- **Integrated data applications** - GPS based location tracking, text messaging and more
- **Longer battery life** for extended work shifts
- **Using proven DIGITAL technology** to enhance performance
- **Added network capacity** ensures dependable system connects every time you P-T-T

### THE DIGITAL DIFFERENCE

Using TDMA (Time-Division-Multiple-Access) digital technology, MOTOTRBO delivers exceptional voice quality, seamless roaming, integrated data applications, increased capacity and extended battery performance. Whether you need coverage at a single site or across multiple sites, MOTOTRBO Connect Plus can be scaled to meet your communication needs.
